

Who are the best solar installers in Georgia?

According to solar shoppers on the EnergySage Marketplace, the top five solar installers in Georgia are IntegrateSun, LLC, NuWatt Energy, Custom Solar Solutions, Astrawatt Solar Atlanta, and Southern Solar Pro. How many solar companies are in Georgia? Should you choose a local or national solar installer?

How do I choose a solar company in Georgia?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. In Georgia, a solar installer must be associated with a licensed electrical contractor.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.06 kW solar panel system to cover their electricity needs, which comes out to \$31,645 before incentives. Prices range from \$26,898 to \$36,392, but after the federal tax credit, that drops by 30%.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Do you need a license to install solar panels in Georgia?

In Georgia, a solar installer must be associated with a licensed electrical contractor. You can find out if an electrical contractor has the required license at the Georgia Secretary of State's website. Financing options Not everyone has thousands of dollars to spend on a solar panel installation.

How much does a 6 kW solar system cost in Georgia?

A 6 kW solar system will cost about \$13,980 in Georgia before incentives. After the 30% federal solar tax credit, this drops to \$9,786, or about \$1.63 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it.
