

What is a solar tax exemption in Georgia?

In Georgia, an exemption for solar systems makes it more economically feasible for taxpayers to install solar panels on a residential or commercial property. However, Georgia does not offer sales tax exemptions. This means that homeowners and businesses would still have to pay state sales tax on their solar panel systems.

Are solar panels tax deductible in Georgia?

Georgia no longer offers a state tax credit for solar panels. The program, which once offered a tax credit equal to up to 35% of the installation cost of the system, with a maximum credit of \$10,500, has been discontinued.

Does Georgia Power pay for excess solar power?

Georgia Power does not pay customers the full retail rate for excess solar power sent back to the grid. Instead, they compensate customers at the avoided energy rate, which is equivalent to the amount that the utility would otherwise pay to buy the power on the open market.

How does Georgia Power's Solar Program work?

Georgia Power's Solar Program helps maximize savings by encouraging the use of solar electricity at home. This reduces the amount of electricity sent back to the grid.

How many kW can a solar system sell to Georgia Power?

Georgia Power has a cap on the size of solar systems that can sell their electricity back to them. Residential systems are limited to 10 kW, and commercial systems are limited to 250 kW. Is Georgia Power's solar compensation the best in Georgia?

What is the solar tax credit in Georgia?

The solar tax credit in Georgia equaled up to 35% of the installation cost of the system, with a maximum credit of \$10,500. However, the program has run out of funding, and now Georgia homeowners can only receive the Federal Solar Tax Credit.
