

How do I choose a ginlong inverter?

Ginlong recommends inverter installed to avoid direct sunlight or raining. To avoid over heating ambient air temperature must be considered when choosing the inverter installation location. Ginlong recommends using a sun shade minimizing direct sunlight when the ambient air temperature around the unit exceeds 104°F/40°C.

How to connect a ginlong inverter to a PV array?

1. Switch the Grid Supply Main Switch (AC) OFF. Switch the DC Switch OFF. Connect the inverter to PV array. Connect the inverter to the grid. GinLong recommend 2 protection methods: AC terminal to connect ground and external heat sink to connect ground . If AC terminal is used to connect ground, please refer to the contents of 5.3.2.

Can a ginlong inverter be exposed to direct sunlight?

Exposure to direct sunlight will increase the operational temperature of the inverter and may cause output power limiting. Ginlong recommends inverter installed to avoid direct sunlight or raining. To avoid over heating ambient air temperature must be considered when choosing the inverter installation location.

How do I set a grid on a Solis single phase inverter?

This function is used to start up or stop the power generation of Solis Single Phase Inverter. Grid ON Grid OFF Figure 6.18 Set Grid ON/OFF Screens can be scrolled manually by pressing the UP/DOWN keys. Press the ENTER key to save the setting. Press the ESC key to return to the previous menu.

How to install an inverter?

Installation 3.3.1 Wall mounting Refer to figure 3.6 and figure 3.7 Inverter shall be mounted vertically. The steps to mount the inverter are listed below. 1. Refer to Figure 3.6, drill holes for mounting screws based on the hole diameter of bracket using a precision drill keeping the drill perpendicular to the wall. 3. Installation 3.

What is a GCI single phase hybrid series inverter?

A GCI single phase hybrid series inverter is a type of inverter used for both PV (Photovoltaic) and wind systems. It features two different Maximum Power Point Trackers (MPPT), one for the PV input and the other for the wind input (from the controller). The inverter can transfer DC power from the PV panels and wind turbine into AC power and feed it into the grid.

GCI single phase hybrid series inverters is used for both PV and wind system. The inverter has two different MPP trackers one for PV input and the other for wind input(from ...
