

What makes Globe a sustainable company?

This approach reflects Globe's deep-rooted commitment to environmental sustainability and responsible corporate citizenship. Globe completes innovative pilot program featuring hybrid solar power, a milestone aligned to achieve Net Zero Greenhouse Gas Emissions by 2050.

How much energy does Globe save?

Results of the initiative have been remarkable, with Globe saving an estimated of over 119,000 liters of diesel fuel and avoiding over 67,000 kWh of electricity consumption, equating to approximately PHP6.9M in savings.

Where does Globe's power come from?

Traditionally, Globe's cell sites have relied on electricity from the national power grid, a significant portion of which comes from coal, and conventional diesel gensets for backup power. But the shift to sustainable sources became an imperative, especially for sites without commercial power-grid connectivity or with unreliable grid conditions.

Where are globe power products made?

Globe Power products are designed with the end user in mind and fully customisable in order to meet the demands of varying industries. Globe Power products are designed and manufactured at the research and development head office in Perth, Western Australia, which boasts a highly skilled design and engineering team. Meet our Leadership team.

What makes Globe power unique?

Our innovation starts with the Globe Power company itself, having a unique business model that combines cutting edge generator and battery design and manufacture, under the one roof. Disrupting typical design boundaries promotes lateral thinking and creativity - in the renewable energy space especially - Globe's forward focus.

Could solar panels provide 65% of global electricity?

Covering the world's rooftops with solar panels could provide 65% of global electricity, according to the findings of new research from the University of Sussex.

The world is witnessing an energy revolution. As traditional coal plants grow older, we're seeing a rapid increase in the use of renewable energy sources such as wind and solar power. This shift is not just about replacing ...
