

Does gogreensolar offer a money-back guarantee?

GoGreenSolar is a leading online seller of solar panels, inverters and DIY solar equipment. We are the only solar company to offer a 100% money-back guarantee. If your permit isn't approved for some reason, we'll refund your money in full. See terms and conditions What's in your Solar Kit ? with Battery

Are solar panels good for the environment?

Solar panels reduce a business or household's reliance on energy supplied from the traditional power grid. Energy supplied directly from the sun has minimal, if any, impact on the environment. Coal, natural gas, hydroelectric generation (dams), nuclear power plants, and oil currently generate the vast majority of electric power for the grid.

Who is 'Solar Done Right' by?

GoGreenSolar is 'Solar Done Right'. We help homeowners and professionals build successful solar projects with custom system design and unparalleled support, saving you 50% or more compared to other companies. Our solar kits include the necessary core components to kickstart your solar system.

Why should I switch to solar energy?

Switching to solar energy can help you slash your energy bills, speed up your payback period, and boost your property's value. You can also cut down unnecessary labor expenses and do it yourself, with reliable support from start to finish. GoGreenSolar has helped thousands of Americans transition to solar energy seamlessly over the past 18 years.

How can I get a free solar quote?

To get a free solar quote, fill out the form and receive a custom satellite layout, system design, and a breakdown of total project cost and estimated savings. GoGreenSolar offers DIY solar panel systems with end-to-end design and installation support from our experts.

What are the benefits of solar power?

Electricity generated by solar panels creates no greenhouse gases and reduces the carbon footprint of any home or business. Solar panels release no poisonous gases, smoke, or other air pollution. In addition, solar power reduces the need for trucks, trains, and ships to transport coal, oil, or gas.
