Go power solar controller reset

How do I Reset my solar panel?

To do a hard reset,disconnect the solar panel and battery wires and wait a few minutes before reconnecting the wires. If your solar panel has no voltage or not working properly,there might be a problem with your charge controller. Now is a good time to do a soft reset.

How do I troubleshoot a solar controller?

If you're having issues with your Bluetooth connections, click here to view connectivity troubleshooting. The solar controller requires power from the battery in order for it to operate (9-14 volts) . The first step in troubleshooting any solar controller is to determine if you have 12 volts to the controller.

When should a charge controller be reset?

Charge controllers should only be reset if there is a problem in the solar panel. Some like to reset the controller every once in a while to refresh the system. However it is not necessary,at least in newer models. The only time you should be rebooting it is if the solar panel or battery is not running properly.

How do I Reset my PWM & MPPT charge controller?

Problems and glitches do happen though,but often a reset will fix it. This is how you do a soft and hard reset for PWM and MPPT charge controllers. To perform a soft reset,press the reset and power buttons together for a few secondsand wait for the solar controller screen to flash and reboot.

How do I Reset my charge controller?

1. Hold the charge controller in your hand. 2. Press the reset button. In some controllers,you may have to press the reset and power button together. And in other models,you have to press four buttons. 3. Press and hold for a few seconds. Release the buttons and the controller screen will blink and flash.

How do you connect a solar controller to a battery?

Connect the battery wiring to the controller first and then connect the battery wiring to the battery. With battery power attached, the controller should power up and display information. Connect the solar wiring to the controller and remove the opaque material from the solar array.
