

What is the \$7 billion Solar for All program?

The \$7 billion Solar for All program aims to create and expand low-income solar programs. Under this program, 60 grant recipients will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

What can help me pay for a rooftop solar system?

There are government subsidies, rebates and loan options that can help you pay for rooftop solar or an associated battery for your home or business. You can save money on a rooftop solar system for your home or business through a range of government assistance schemes.

What is a solar loan?

A solar loan allows you to borrow part or all of the cost of your solar system and/or battery. By reducing or removing the upfront cost, an interest-free or low-interest loan makes solar or a battery more affordable because it can be paid off more quickly, potentially using the bill savings it creates.

What is the FHA solar loan program?

The program enables homeowners to finance energy efficient improvements, like solar, with their FHA-insured mortgage. This program works to make cost-effective energy improvements to lower utility bills and make more income available for the mortgage payment.

How many households will benefit from the Solar for All program?

Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

How can a loan make solar more affordable?

An interest-free or low-interest loan makes solar or a battery more affordable because it can be paid off more quickly, potentially using the bill savings it creates. By reducing or removing the upfront cost, a loan allows you to borrow part or all of the cost of your solar system and/or battery.
