

What is a solar battery rebate?

The battery must be installed and turned on after July 1, 2025. This rebate is structured similarly to the current Small-scale Technology Certificates (STCs) used for solar panels. It gives you an upfront discount. But you only get to claim this battery rebate once. That means you need to size your system carefully from the start.

Am I eligible for a solar or battery rebate?

You may be eligible for a solar or battery rebate depending on your location. Some states and territories allow you to apply for a rebate on top of an interest-free loan. These can complement one another and further reduce the cost of your system. You will still be able to collect small-scale technology certificates (STCs) under the Small-scale Renewable Energy Scheme (SRES).

What is labor's solar battery rebate?

At its core, Labor's plan seeks to make solar battery storage more accessible to Australians. The rebate will cover 30% of the cost of installing a home battery system, with the average Australian home saving around \$4,000 on the cost of installation.

What is a solar rebate or subsidy?

A solar rebate or subsidy covers part or all of the upfront cost of buying solar or a battery. Rebate schemes operated by states, territories, and local governments may have specific eligibility criteria based on the type of housing or the people applying.

What solar rebates are available in Australia?

For a complete overview of all solar rebates and incentives available in Australia, visit our comprehensive guide on Solar Rebates. Small-Scale Renewable Energy Scheme (SRES): Designed to make solar more accessible for homeowners and small businesses, the SRES provides upfront savings through Small-Scale Technology Certificates (STCs).

Can I get a solar rebate if I upgrade my System?

Adding more solar panels or upgrading your system to be battery-compatible can increase the amount of energy your system generates and store more of it for use when needed. This upgrade could make you eligible for the rebate, allowing you to maximise your savings on both installation and energy bills.
