

Grants for electric car charging station in residential complex

What is a EV charging Grant & how does it work?

The grant provides electric vehicle (EV) drivers with support towards the costs of the purchase and installation of EV chargepoints at residential properties if they are also installing a cross-pavement charging solution (e.g. a cable channel). You can get 75% off the cost to buy and install a socket, up to a maximum of \$350.

How much EV charging subsidy for new EV purchasers?

Anhui: 313 USD charging subsidy for new EV purchasers. Among these incentives, investment subsidies refer to subsidies to investment entities based on a percentage of the total investment.

What are charging subsidies?

Charging subsidies are subsidies provided to EV customers to purchase EVs, which promote the adoption of EVs by local customers and thus increase the demand for charging at local charging stations. The main stakeholders involved in the EVCI deployment process include governments, infrastructure investors, and end-users.

How much does it cost to build a charging station?

In terms of infrastructure construction costs, according to data from the China Electric Vehicle Charging Infrastructure Promotion Alliance, the investment in charging equipment construction for charging stations is about \$250,000.

How much does a charging subsidy increase EV deployment rate?

This is manifested by that the current higher level of charging subsidy \$4 = 1569 USD only increases the deployment rate to about 0.355. In fact, the focus of Chinese government fiscal incentives is shifting from subsidizing EV purchases to subsidizing charging facility operations.

What are the EV charging subsidies in China?

Shandong: Construction subsidies based on 40% of the total investment minus the purchase cost of charging facilities. Beijing: Daily operation subsidy standard is 0.016 USD/kWh. Jiangxi: Municipal subsidy standard is 0.047 USD/kWh. Shanghai: 784 USD charging subsidy for EV consumers. Anhui: 313 USD charging subsidy for new EV purchasers.
