

Does Green Day power install solar panels?

Green Day Power installed my solar panels and solar batteries at different times. In both cases they explained everything first and did a careful job. They also gave me an excellent price. When I had a problem months after battery installation, they came very quickly and fixed the problem.

Who is Green Day power?

Welcome to Green Day Power, Inc. We always provide high-quality work that produces an exceptional product. We pride ourselves on the relationships we build with all of our clients and look forward to serving you on your next home project.

Can Green Day power be done for an additional cost?

When I pushed Green Day Power finally said that it could get done for an additional cost. If you are in the same boat as I was and you can't get your project manager on the phone then call the main office (for Green Day Power) and ask for sales.

Does Green Day Solar install inverter in garage?

The installation guys ran off and no reply from anyone from Green day solar. Secondly, I asked those guys install the inverter in the garage. They said as per the design its outside. we need extra money to install inside. If you like surprises go Greenday power.

Does Green Day power subcontract?

For green day company, all the people who came for installation were company employees, so they do not subcontract. All the employees were very professional and knowledgeable on what they were doing. They are very very punctual and very responsive. Process is very transparent and we are happy that we went with green day power.

Does Green Day power return phone calls if system goes offline?

They do not return phone calls or emails, even when the system has gone offline. Our system has been installed for 16 months and has worked for 8 WEEKS!! (not a typo) We average \$430 in sdge bills each month, with Green Day Power solar panels and a Generac back up battery.

Green Day Power, Rancho Cordova, California. 6,355 likes & 1 talking about this & 50 were here. We are California's #1 Family-Owner Solar, Roofing & Generator Company.

After 1st month I noticed we continued to get large electricity bills even after solar was installed. No increase in usage and we bought large enough capacity. We called manufacturer and they asked us to contact Green Day Power as they saw the panels not producing enough energy and installer(GD) should dispatch to fix. Ever since we were given ...

Green Day Power just installed my solar system. They team was fantastic! The install lead, Jake, was really helpful and walked me through the day and system and made sure I understood the process. Most importantly, in these crazy ...

The investment return and savings that can be made by buying solar panels varies more by city and utility in California than in any other state in the country. This is largely due to the fact that California's electric utilities are "solar friendly", making it possible for people in most cities to choose whether to keep their retail electric provider, or switch to solar power.
