

What is Green Mountain Power's net metering program?

Green Mountain Power's (GMP's) net metering program credits customers who generate solar energy and send their excess generated energy back to the grid. This allows customers to generate and use power simultaneously, and it incentivizes the use of solar power.

What incentives does Green Mountain Power offer?

Green Mountain Power offers financial incentives in the form of monetary credits. Customers with solar panel systems less than 15 kW receive \$0.01/kWh in monetary credit.

Does Green Mountain Power offer off-peak rates?

Green Mountain Power still has some customers with off-peak rates, but is not currently offering this option for new customers. Offering off-peak power for customers who can 'store' electricity as thermal energy (hot water) helps the utility company 'level' electrical demand.

How much is a Green Mountain Energy Rebate?

2 Green Mountain Energy rebate amount varies by project, system size, location, and availability of additional rebates. The average rebate is \$3,200, and the actual rebate ranges from \$892 to \$5,625 (based on projects funded between January 2020 and December 2020).

Who can participate in GMP solar?

Any Green Mountain Power customer with metered service may participate. GMP solar is a net metering program that credits customers who generate solar energy. The amount a customer receives is based on the value of the energy that GMP charges the customer, there are additional adjusting values that you could be entitled to. See Rule 5.100.

Why choose Green Mountain Energy for residential electricity plans?

When you choose Green Mountain Energy for your residential electricity plans, you're not just reducing your carbon footprint -- you're helping build a cleaner future for the planet. As the nation's longest-serving renewable energy retailer, we're committed to building that future right alongside you.
