What is a Growatt inverter?

The Growatt 11.4kW Grid-Tie Inverter (MIN11400TL-XH-US) offers advanced performance with a nominal output of 11,400W and up to 98.5% efficiency, ensuring maximum energy production for both residential and commercial solar systems.

How to choose a grid tie solar inverter?

When purchasing a grid tie power inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it. Consult with the grid tie solar inverter manufacturer when in doubt and read the guidelines.

What is a grid tie inverter?

Unlike off-grid inverters, grid tie inverters have a special control device to match the inverter cycles with the utility grid cycles. They need to be in phase, otherwise the voltages will cancel each other out. The size of a solar inverter is usually measured in Watts.

Can a Growatt inverter be installed in a three-phase AC grid?

When several Growatt inverters are installed in a three-phase AC grid, it is recommended to distribute the inverters between the phases to reduce power unbalances. Always refer to local standards.
