

What is a Growatt hybrid inverter?

Growatt series hybrid inverters are designed to convert the DC power generated by the PV panels into three-phase AC power and export it to the grid or store the DC power in the batteries. The MID 11-20K TL3-XH series inverters feature 2 maximum power point (MPP) trackers.

How does a Growatt Inverter work?

A Growatt Inverter converts DC Current from a PV generator into AC current. It is suitable for mounting indoors and outdoors. The inverter converts DC power into AC power that can be used as follows: Growatt can preset special grid parameters for other countries installation locations according to customer requests after evaluation by Growatt.

What is a Growatt series photovoltaic inverter?

Require to order extra if you need it. Growatt series photovoltaic inverters are used to convert the direct current generated by photovoltaic panels into alternating current, and send it to the grid in a three-phase manner.

How to set up a backup mode on a Growatt inverter?

When the grid goes down, the max. output power of a fully charged battery reaches 30kW. Only professional personnel are allowed to configure the backup mode. To enable the backup mode, you need to purchase a backup box from Growatt. Turn on the DC switch on the inverter.

Can a Growatt inverter be connected to 240VAC?

The Growatt inverter is factory set for utility interconnection with 240VAC. However, you can change the setting through the LCD to fit different utility configuration types. It is possible to connect the inverter to 240VAC based on local grid standards.

Are Growatt inverters safe for use?

Growatt inverters are built according to all required safety rules. They are safe for use, but improper use of the units and other property, as well as aggregated installations above 30 kW on a single Point of Common Connection, can pose risks. The inverters convert DC power from PV panels to AC current for grid connection and control the current accordingly.
