

What is Growatt smart meter?

Growatt Smart Meter is one-on-one solution for grid export limitation and self-consumption monitoring. It is compatible with Growatt solar and storage inverters. With RS485 communication and direct connection to inverter, it is easy for installation and cost effective. Growatt provide direct connection meter and CT meter as options.

How do I connect a smart meter to a Growatt inverter?

Simply connect the smart meter to the RS485 port of your inverter to enable direct communication. This ensures accurate monitoring of both energy consumption and production. This meter is suitable for Growatt inverters up to 50kW, making it versatile for different installation sizes.

Does Growatt provide direct connection meter & CT meter?

Growatt provide direct connection meter and CT meter as options. Growatt Smart Meter is one-on-one solution for grid export limitation and self-consumption monitoring. It is compatible with Growatt solar and storage inverters. With RS485 communication and direct connection to inverter, it is easy for installation and cost effective.

What is RS485 meter & Growatt smart meter?

With RS485 communication and direct connection to inverter, it is easy for installation and cost effective. Growatt provide direct connection meter and CT meter as options. Growatt Smart Meter is one-on-one solution for grid export limitation and self-consumption monitoring.

What is a Growatt solar inverter meter?

A solar inverter is a device that changes the DC electricity from your solar panels into AC electricity that can be used by your home or business. The Growatt Solar Inverter Meter is a device that helps you to monitor the performance of your solar inverter and make sure it is working properly.

What monitoring solutions do Growatt inverters offer?

Growatt inverters offer a range of monitoring solutions, from small domestic desktop monitors to large scale solar farm solutions. The Shine Vision Desktop Monitor is a simple solution for local monitoring.
