

Does Growatt 8kW grid tie inverter stay on standby?

Growatt 8kw grid tie inverter stays on standby? I have a Growatt 8kw split phase (US type) grid tie inverter that has been working perfect for a few years now with only problems being the isolation of the solar panel wiring, that's been fixed. Yesterday it stayed on standby when it should have switched on.

Do Growatt units come out of standby mode?

They confirmed voltages are all within spec, but the Growatt units both never come out of standby mode, and show all zeros in the app except for internal temperature, as shown in the attached screenshot. I've tried the grid code suggestions mentioned here, but no luck.

Are Growatt units grid tied?

They are grid tied and were installed by electricians who work on solar almost exclusively. They confirmed voltages are all within spec, but the Growatt units both never come out of standby mode, and show all zeros in the app except for internal temperature, as shown in the attached screenshot.

Is my Growatt inverter faulty?

Unfortunately, it sounds a lot like the inverter is faulty. Growatt doesn't have a great reputation for reliability. If you could use another inverter to test it, then you would know if the problem is coming from the inverter.

Is a Growatt Min 10000 bifacial inverter on a grid?
