

Is Growatt better than Sungrow?

In addition to its popular string inverters, Growatt also offers hybrid inverters that can be paired with battery storage systems, catering to homeowners who want to store excess solar energy for later use. While Growatt's product range is more limited compared to Sungrow, their offerings still provide solid solutions for residential customers.

Are Sungrow & Growatt inverters better?

Sungrow inverters generally offer higher efficiency, typically around 98-99%, making them a great choice for those looking to maximize energy production. Growatt inverters are slightly less efficient, typically around 97-98%, but still provide excellent performance for residential installations.

Who makes Growatt solar inverters?

Growatt is a Chinese brand founded in 2010. It is a major supplier of solar inverters for homes, businesses, and utilities worldwide. Growatt offers three main types of inverters: Single-phase: These inverters are suitable for small to medium-sized homes with a single-phase grid connection.

What is a Sungrow inverter?

Sungrow inverters are known for their exceptional efficiency, typically ranging from 98% to 99%. This high efficiency ensures that the maximum amount of solar energy is converted into usable power, making them an ideal choice for both residential and commercial installations.

How efficient is a Growatt inverter?

Higher efficiency results in less energy loss and more savings. Growatt inverter efficiency ranges from 94% to 99% depending on the model and type of inverter. This places them among the top performers in the market, especially compared to some of the European brands that have lower efficiency ratings.

Where are Sungrow solar inverters made?

Headquartered in China, the company is renowned for its commitment to innovation and research in the renewable energy sector. With a strong presence in over 60 countries, including Australia, Sungrow has earned a reputation for producing high-quality, reliable, and efficient solar inverters.
