

What is Gulf Power's first solar farm?

Gulf Power's first solely owned and operated solar farm opened last year in Jackson County as the Blue Indigo Solar Energy Center. The company is planning an additional solar farm in northern Escambia County called the First City Solar Energy Center as well as one in Santa Rosa County called the Blackwater River Solar Energy Center.

What is Gulf Energy?

Gulf Energy is one of the leading private sector power generation companies in Thailand with a strategic portfolio of ten operating gas-fired projects and a total installed generation capacity of 4,373 MW. Gulf Energy's equity capacity in these projects is 1,755 MW.

Is Gulf Power Building a solar farm in Escambia County?

Gulf Power officials announced Tuesday that the company was beginning construction on its first owned and operated solar farm in Escambia County. The power company said construction is underway on the new Cotton Creek Solar Energy Center in northern Escambia County.

Where is Gulf Power's new solar farm?

According to a Gulf Power press release, the 639-acre solar farm is located off of Bogia Road just west of U.S. 29 and will be completed by the end of the year. The new facility is part of several new solar farms Gulf Power is building across the Florida Panhandle, in addition to the four solar farms that are already up and running.

How many jobs will Gulf power's solar projects create?

The two projects are each expected to create roughly 500 jobs as they're being built. In addition to its solar projects, Gulf Power also recently broke ground on the FPL Manatee Energy Storage Center, which is set to be among the world's largest integrated solar-powered battery systems, as well as the largest battery installation on the East Coast.

What are the new solar energy centers in the Panhandle?

The new solar energy centers under construction in the Panhandle are the Cotton Creek Solar Energy Center in Escambia County and the Blue Springs Solar Energy Center in Jackson County, both of which are set to clock in at 74.5 MW. The two projects are each expected to create roughly 500 jobs as they're being built.

Gulf Power has replaced its Escambia County coal-fired station with the renamed Gulf Clean Energy Center gas-fired plant, reducing comparable emissions by 40 percent.

Gulf Power's proposed solar farm in northern Walton County, FL will move forward, but not without some scrutiny from county officials.
