

What is a 20ft half height offshore basket container?

Just like the Half Height Open Top, the 20ft Half Height Offshore Basket container is twice as low compared to the standard height. It also does not have a steel roof. However, this type of container has no side doors or tarp. By using twist locks, these containers can also be stacked so that two units can be transported as one ISO container.

What is the largest half height container?

Cargostore's 24ft Half Height is the largest Half Height container we supply, suitable for offshore conditions.

What is a 24ft DNV half height container?

The 24ft DNV Half Height Container is the largest size of our Half Height range, suitable for the transportation and storage of heavier goods offshore. This unit is designed to be fitted with a tarpaulin and comes with internal lashing points. It is certified to the DNV 2.7-1 standard.

Are your offshore containers certified?

All our offshore containers are certified in accordance with standards DNV 2.7-1, EN 12079, ISO and CSC. The specified measurements are an indication and can in reality slightly vary. Want to rent or buy this container? Call our account managers on working days between 08.00 and 17.00 on +31 (0)181 263 466 or use the contact form below.

What is a half-height container?

One of the key features of half-height containers is a removable hard lid for easy loading and unloading of cargo. This is beneficial, especially with over-height goods that require an open lid when transported or stored. This feature is what differentiates half-height containers from dry shipping containers.

Are half-height containers DNV certified?

Half-height containers can be DNV-certified if used in the oil and gas industry or offshore areas. However, the design and features might require alteration to fulfill the DNV 2.7-1 certifications. What are the benefits of using half-height containers? Half-height containers are specially designed containers for specific uses.
