

Are solar batteries tax deductible in Massachusetts?

Massachusetts does not have any state-specific tax incentives for energy storage systems like solar batteries. However, homeowners installing a solar battery can still save on their taxes with the federal investment tax credit (ITC).

How can a resident participate in a battery storage program?

Residents can participate in the program by either installing a battery storage system with a new solar panel system, adding a battery storage system to an existing solar system, or installing a stand-alone battery storage system for their home. A device called an inverter will control your battery. Qualifying inverters include:

What is solar Massachusetts's renewable target program?

The Solar Massachusetts's Renewable Target (SMART) program pays Eversource, National Grid, and Unitil customers a bonus for each kilowatt-hour (kWh) of electricity produced by their solar panel system. An additional bonus, or 'adder', is offered if a solar panel system is paired with a battery.

What is a battery storage system?

The Sponsors of Mass Save offer incentives for reducing energy use during periods of peak electricity demand. A battery storage system operates like a rechargeable phone, tablet, or laptop battery, but on a much larger scale. Many residents use battery storage systems to be prepared for power outages.

Can solar power be stored in a battery?

Yes, solar power can be stored in a battery. Existing solar systems typically have solar inverters which change the DC power produced by panels to AC power. However, to store that AC power in a battery, it needs to be inverted again to DC power.

What storage incentives are available in Massachusetts?

The Solar Massachusetts's Renewable Target (SMART) program pays a bonus for each kilowatt-hour (kWh) of electricity produced by solar panel systems in Massachusetts. This applies to customers of Eversource, National Grid, and Unitil.
