

What do you need to know before installing a solar system?

If you are planning to install a solar system or buy a solar generator, you must master the basics of electricity and power generation. This means fully understanding what volts, amps, watts, and watt-hours are and how they relate to meeting your power generation needs.

What is solar power & how does it work?

Most of us understand what solar power is and how it generally works. Solar panels convert sunlight into electricity, which is then transmitted to a battery or directly to a load (an appliance, machine etc.). If you are planning to install a solar system or buy a solar generator, you must master the basics of electricity and power generation.

What are the basic components of a solar power system?

A solar power system consists of solar panels, batteries, and charge controllers. This guide will walk you through the basics of a solar power system and teach you how to build one yourself, produce electricity, and shrink your bills!

How do I choose a solar system for my home?

Homeowners should consider their total energy consumption, peak usage times, and the specific solar technologies available. This assessment will allow users to select a system--whether grid-tied, off-grid, or hybrid--that best aligns with their energy goals, ultimately maximizing the benefits of solar power.

When will solar energy be a major source of electricity?

International Energy Agency is expecting solar energy to be a major source of electricity by 2050. They may not produce as much energy as a nuclear power plant, but the efficiency is improving. Cities all around the world are quickly adopting solar power.

How do solar panels generate energy?

Solar panels generate energy by converting the sun's photons (or light particles) into an electric current to power homes or businesses. We use the terms "irradiance" or "insolation" to refer to the power density of sunlight on a surface. In layperson's terms, these values represent a roof's solar potential. An irradiance map of Mt.
