How does solar power billing work

How do solar energy credits work?

When your solar panels produce more electricity than you need, that energy is sent to the grid in exchange for credits. Then, when your home solar system isn't producing as much electricity as you need, you pull energy from the grid and use these credits to offset the cost of that energy.

How does PPA billing work?

In PPA billing: Your solar company owns the system. The system's expected annual output sets the price you pay for your energy. You can choose to pay a monthly or prepay upfront for all the expected production. Unlike plans from other providers, Sunrun's monthly PPAs feature fixed monthly bills, regardless of production.

How does a solar lease work?

The contract in a solar lease stipulates that your solar provider fund the financing, permitting and installation of a home solar system for little or not cost. It then charges you a monthly rate for its use during the length of your lease term. 4 Here are the main features of the agreement: Your solar company owns the system.

Do I need to install equipment to read my electricity bill?

You don't need to install any equipment to read your electricity bill. Your solar panels will generate electricity, which will offset the amount of electricity you need to buy from the utility company.

Why do you need a solar lease & PPA?

Sunrun's solar leases and PPAs spare you the high upfront costs of a home solar system. We offer you professional installation,maintenance,monitoring, along with insurance during the length of your contract. And if you sell your home, we guarantee a seamless agreement transfer for the new buyer/owner of the property.

What is a prepaid solar PPA?

A prepaid PPA, like Sunrun's BrightSave(TM) Prepaid, also accounts for the federal solar tax credit, 6 so it feels like buying a system, but without the hassle of dealing with IRS forms. It simplifies your life with bumper-to-bumper coverage over the life of the product. Are Solar Lease and PPA Plans Worth It?
