

Should I convert my home to solar power?

When you decide to convert your home to solar power, the first thing that you can do is to make your home as energy efficient as possible before you do anything with solar panels. You can do so by: Having an energy efficient home from top to bottom can only help you save even more money and tread more lightly on Mother Earth.

How do I convert my home to solar energy?

To convert your home to solar energy, you may also want to install a solar water hot water tank. In order to get hot water, normally people rely on an electric hot water tank, but this uses about 25% of a household's energy. By installing a solar hot water tank you are saving yourself a good amount of money each month.

How can I use solar energy to power my home?

To power your home with solar energy, you have two primary options: install panels on your property or join a community solar farm. The latter involves paying a monthly fee to get power from a solar farm. Due to recent policy changes, there are numerous community solar farms planned for Maine.

How can I learn about solar?

You can also watch videos, look at their buyer's guide, or start getting quotes. Their Solar 101 series of articles will help you understand the basics, and when you're done, scroll through the site's "Learn About Solar" sidebar to read even more articles that'll give you a feel for the process.

Do you need an inverter or a solar panel?

Different installers may carry or recommend different panels and inverters, too. (Inverters convert the direct current from the panels to alternating current for your home.) More-efficient panels are naturally more expensive, but may be necessary if you can't fit enough lower-efficiency panels on your roof to cover your home's electricity usage.

Should you buy a solar power system?

Considering a typical solar power system can cost upwards of \$10,000, a loan may be attractive. Plus, with a loan, as long as your monthly payment is lower than your monthly electric bill, you start saving money on day one. Purchasing the system upfront means you won't break even for a few years (though again, you spend less in the long run).

There are a lot of good reasons to consider adding solar energy to your home. The price of electricity from the grid has been trending upward for a while now, for one thing. And climate change is ...
