

What is a solar PPA?

A solar PPA, or Solar Power Purchase Agreement, is a financing mechanism commonly used to fund larger renewable energy projects.

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (solar PPA) is an arrangement where you contract with a solar developer that pays for, installs, and maintains a solar system on your property.

What happens after a solar energy system is installed under a PPA?

After a solar energy system is installed under a Power Purchase Agreement (PPA), you simply pay for the electricity. A PPA is a legal agreement for installation of a solar energy system on a property.

Is going solar with a PPA a good idea?

Going solar with a Power Purchase Agreement (PPA) has both advantages and disadvantages. One of the main pros is that most solar PPAs offer a \$0-down way to go solar, meaning you won't start paying until the solar panel system starts generating electricity for your home.

Who pays for the solar system in a solar PPA?

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.

What makes a good solar power purchase agreement?

A Power Purchase Agreement (PPA) for solar farms and renewable energy is a legal contract between the buyer and seller. Therefore, it is vital to notice the terms that make a good PPA. A longer commercial lifetime for a renewable energy PPA will benefit both parties.
