

How to use public charging stations to charge your car

How do I use a public EV charger in the UK?

Using a public Electric Vehicle (EV) charger in the UK typically involves the following steps: Find a public EV charging station using resources like mobile apps, online maps, or your car's navigation system. These platforms provide information about charging station locations, availability, and connector types.

Can EV owners use public charging stations?

Yes, EV owners can use public charging stations. These stations are a convenient solution for those who don't have access to at-home charging. Even if you have a charger at home, public charging stations are vital for longer road trips to replenish the vehicle's charge.

How do you charge an EV at a gas station?

While charging an EV is different from refueling your car at a gas station, expanding infrastructure means that EV charging has never been easier. The basic steps of recharging your EV at a public station are: Pull the car up to the charger. Turn the car off. Plug in a fuel-supply cord.

Can You charge a car on a public charger?

You can generally charge any car on a public charger, as long as the charging plugs are compatible with those on your car. Most public chargers are direct current (DC), which means the power has been converted to DC before it is delivered to the EV, resulting in a faster charge time.

How do I find a public EV charging station?

Find a public EV charging station using resources like mobile apps, online maps, or your car's navigation system. These platforms provide information about charging station locations, availability, and connector types. Zap-Map is the most popular UK charging station locator.

Should you use a public EV charger?

Public EV chargers also provide an opportunity to charge your car up far more quickly than most home chargers. A growing number of locations around the UK offer charging speeds of up to 350kW and, while only a handful of models can charge this quickly, even charging at half this rate will significantly increase your charging time.
