

How to install Huawei inverter outdoors?

To install a Huawei inverter outdoors safely, you are advised to install it in a sheltered place or install an awning over it. Additionally, if you live in a salt area (within 500 meters from the coast or prone to sea breeze), consult Huawei before installation to prevent corrosion.

What should I do if my Huawei inverter fails?

If your Huawei inverter fails, first check whether the output is short-circuited. If the fault persists, contact Huawei technical support. The inverter detects its external working conditions in real time and automatically recovers after the fault is rectified.

Which power meter is compatible with Huawei sun2000?

Huawei recommends the following switch specifications: Recommended: a three-phase AC circuit breaker with a rated voltage greater than or equal to 500 V AC and a rated current of 125 A. Prepared by users C Power meter The SUN2000 can connect to the DTSU666-H, DTSU666-HW, YDS60-80 and YDS60-C24 power meters.

How to connect Huawei sun2000 WiFi?

SUN2000 WiFi login Scan the QR code to QR code connect to the Huawei SUN2000 WiFi network. Issue 03 (2022-08-30) Copyright © Huawei Technologies Co., Ltd. Surge protection is supported on both the DC and AC sides. Figure 2-5 Schematic diagram 2.4.2 Working Modes The SUN2000 can work in Standby, Operating, or Shutdown mode.

Will a Huawei inverter corrode in salt areas?

A Huawei inverter will be corroded in salt areas. Before installing the inverter outdoors in such areas, consult Huawei. A salt area is defined as the region within 500 meters from the coast or prone to sea breeze.

What is a sun2000 inverter?

The SUN2000 is a three-phase grid-tied PV string inverter that converts the DC power generated by PV strings into AC power and feeds the power into the power grid. Figure 2-1 shows a model number of the SUN2000, using SUN2000-50KTL-C1 as an example. Table 2-1 describes the rated output power and voltage of all models of SUN2000.

Maintain the inverter with sufficient knowledge of this document and proper tools and testing equipment. Before performing maintenance tasks, power off the inverter and wait at least 5 ...
