

How do I fix color inversion on my Huawei phone?

To fix the color inversion issue, first try disabling the feature by opening Settings and searching for 'Color inversion'. If that doesn't work, try resetting all settings on your phone. If the issue persists, the screen may be faulty, so back up your data and visit an authorized Huawei Customer Service Center for assistance.

How do I change the color inversion on my Android phone?

On most Android phones, there should be a 'Color inversion shortcut' switch in the 'Color inversion' menu that you can enable. When you do, this will create a button that will float on the screen and you can switch between inversions at any time. Alternatively, you can add color inversion to your Android phone's Quick Settings. To do this:

How to invert colors in Samsung Galaxy devices?

This would be your reaction for sure I know). Now once you have the panel over the screen you will be able to see an option named Invert Colors under the traditional scrollbar of the set of icons. #2 The above settings are for stock Android but for the Samsung Galaxy devices you need to head on to the Settings and then Accessibility.
