

Why should you choose a Huawei hybrid inverter?

With the addition of a higher power model (25 kW) to the series, Huawei it is able to adapt to the needs of each user by offering flexibility through a wider range of options. These high-power hybrid inverters fulfil the wishes of many users and installers seeking the reliability and guarantee of Huawei and the use of batteries for energy storage.

Does Huawei have a solar inverter?

Building on decades of experience in large-scale commercial and utility solar, Huawei jumped into the residential solar market in 2018 with an efficient, lightweight hybrid solar inverter offering an impressive range of features at a competitive price.

What is a hybrid solar inverter?

A standard solar inverter only converts DC power from solar panels into AC power for household use, while a hybrid inverter does this and enables energy storage in a battery. This means that the excess solar energy can be stored for later use with a hybrid inverter instead of feeding it back into the grid.

What is a Huawei sun2000 8-10k-lc0 hybrid inverter?

The Huawei SUN2000-8-10K-LC0 single-phase on-grid hybrid inverter, with a capacity of 10kW, offers an advanced solution for residential and industrial photovoltaic systems.
