

Does Idaho Power support solar energy?

Idaho Power supports solar energy and fair prices for all. Customers who install their own generation sources -- usually solar, but also wind, hydropower, geothermal or fuel cells -- can offset some or all of their energy needs.

Does Idaho have a solar tax credit?

As a provision of the recently-passed Inflation Reduction Act, this 30% tax credit has been extended through the end of 2032. Idaho has a strong state-level program called the Residential Alternative Energy Tax Deduction. This allows payers to save up to 40% of the cost of their home's solar, wind, and geothermal power installations.

What is the best solar incentive in Idaho?

The best solar incentive in Idaho is the combination of the state tax rebate with the Federal Solar Investment Tax Credit. We will provide the details on these programs and some local incentives to help you see why the push to solar power is such a smart move.

Are solar panels tax deductible in Idaho?

This is one of the stronger programs in the industry and one that is well worth considering. There is no tax credit for a residential solar system purchase in Idaho. This means that you will still be subject to the sales tax rate of 6.50% for your new solar power system purchases.

How much does a solar system cost in Idaho?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$14,280 in Idaho.

How many solar projects does Idaho Power own?

Idaho Power has contracts to buy energy from 27 solar projects in Idaho and Oregon. Of these, 21 projects are currently online and represent a combined capacity of 476 megawatts (MW). Projects still under development are scheduled to add 377 MW. Idaho Power does not own or operate these projects.
