

Does Idaho Power support solar energy?

Idaho Power supports solar energy and fair prices for all. Customers who install their own generation sources -- usually solar, but also wind, hydropower, geothermal or fuel cells -- can offset some or all of their energy needs.

Is it possible to install solar panels in Idaho?

Installing solar panels in Idaho is a great idea. With a solar energy system on your roof, the need for electricity from the power company can be significantly reduced. Solar power in Idaho can offset your electric bill and go solar for less than you think thanks to state solar rebates.

How many solar projects does Idaho Power own?

Idaho Power has contracts to buy energy from 27 solar projects in Idaho and Oregon. Of these, 21 projects are currently online and represent a combined capacity of 476 megawatts (MW). Projects still under development are scheduled to add 377 MW. Idaho Power does not own or operate these projects.

What is the Idaho State solar program?

The Idaho State Solar Program is a financial incentive program designed to attract solar installations on commercial and residential buildings. It offers rebates and incentives on a first-come, first-served basis.

Is Idaho a good place to install solar panels?

Idaho is a great location for solar installations due to its low cost of electricity and high potential for solar installations, despite being a cloudy state. The sun shines on Idaho for most of the day. Idaho is a good place to install solar panels because of these factors. The best Idaho solar installers are provided by Smart Energy USA.

How much do solar panels cost in Idaho?

As of February 2024, the average solar panel system costs \$2.85/W including installation in Idaho. For a 5 kW installation, this comes out to about \$14,245 before incentives, though prices range from \$12,108 to \$16,382. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.
