

Does Idaho Power support solar energy?

Idaho Power supports solar energy and fair prices for all. Customers who install their own generation sources -- usually solar, but also wind, hydropower, geothermal or fuel cells -- can offset some or all of their energy needs.

How many solar projects does Idaho Power own?

Idaho Power has contracts to buy energy from 27 solar projects in Idaho and Oregon. Of these, 21 projects are currently online and represent a combined capacity of 476 megawatts (MW). Projects still under development are scheduled to add 377 MW. Idaho Power does not own or operate these projects.

Can you get a solar loan in Idaho?

For some, financing can be the biggest barrier to going solar. Idaho makes it easy with its State Energy Loan Program, which can be used for home energy upgrades including solar panels, insulation, windows, HVAC, and more. The interest rates vary depending on the loan you select, but won't exceed 7%. You can choose from the following options:

How much does a solar system cost in Idaho?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$14,280 in Idaho.

Are solar panels worth it in Idaho?

Solar panels are worth it in Idaho. If you pay for your system with cash, you'll save about \$9,607 over 20 years on electricity costs with a 5 kW system in Idaho based on real solar quote data from our Marketplace. Can you get solar panels for free in Idaho?

How much is a solar tax deduction in Idaho?

The deduction can't exceed \$5,000 each year and follows the schedule below: For some, financing can be the biggest barrier to going solar. Idaho makes it easy with its State Energy Loan Program, which can be used for home energy upgrades including solar panels, insulation, windows, HVAC, and more.
