

Image a charging station for electric-powered tesla cars

Where can I charge a non-Tesla Electric Vehicle?

Most useful for Electric Vehicle (EV) drivers and owners will likely be Tesla destination chargers, most commonly found at hotels, parks, and shopping centers. These chargers are primarily designed for Tesla vehicles and it's unlikely they will allow for non-Tesla charging unless Tesla goes around and updates those chargers.

What are the charging stations provided by Tesla?

Tesla's charging stations, known as Superchargers, range in power from 72 kW for Urban Superchargers to 250 kW. They create efficient recharging opportunities for Tesla's EV drivers. In 2020, Tesla's pay-as-you-go Supercharger network was more widespread, better integrated for road trips, and easier to use compared to rival networks.

Can a non-Tesla electric vehicle charge at a Tesla Supercharger station?

Non-Tesla electric vehicles can charge at some Tesla Supercharger stations with the use of an adaptor such as the Magic Dock. You might think you need a Tesla to charge your electric vehicle at a Tesla station, but that is not the case.

Is this Tesla charging station a car wash?

This Tesla charging station at the Shell gas station is not just a charging station, but also a battery swap station. It was previously a car wash, as shown in construction pictures. Here are a couple of those pictures:
