

# India's total solar power installed capacity

How big is India's solar power sector?

India's solar power sector has witnessed an extraordinary 3450 % increase in capacity over the past decade, rising from 2.82 GW in 2014 to 100 GW in 2025. As of January 31, 2025, India's total solar capacity installed stands at 100.33 GW, with 84.10 GW under implementation and an additional 47.49 GW under tendering.

How much solar power does India have in 2025?

India has achieved a historic milestone by surpassing 100 GW of installed solar power capacity. As of January, 2025, India's total solar capacity installed stands at 100.33 GW with remarkable growth trajectory (see infographic). 84.10 GW is under implementation and an additional 47.49 GW under tendering.

How did India's solar power sector perform in FY24?

India's solar power sector led the renewable energy growth, with capacity additions soaring from 15 GW in FY24 to nearly 21 GW in FY25, a remarkable 38% increase. The country also achieved the significant milestone of surpassing 100 GW of installed solar capacity this year. Domestic Solar Manufacturing Scales New Heights

Which state has the most solar power in India?

In 2024, Rajasthan leads with 7.09 GW capacity, followed by Gujarat with 4.32 GW and Tamil Nadu with 1.73 GW. These top 3 states account for 71% of India's total solar utility-scale solar installation. Rooftop Solar: India added about 4.59 GW of new rooftop solar capacity in 2024, a 53% increase compared to 2023.

How has India's solar power sector changed over the past decade?

Unprecedented Growth in Solar Sector India's solar power sector has witnessed an extraordinary 3450 % increase in capacity over the past decade, rising from 2.82 GW in 2014 to 100 GW in 2025.

How much solar power is installed in India in 2024?

Disclaimer: This information has been collected through secondary research and IBEF is not responsible for any errors in the same. As of June 2024, India's total installed solar capacity reached 87.2 GW, following a record installation of about 15 GW in H124, representing a 282% increase from the same period in the previous year.

With these additions, India's total installed renewable energy (RE) capacity reached 209.44 GW as of December 2024. Solar energy accounts for approximately 47% of the total RE segment, making it the most significant ...

India's solar industry is experiencing significant growth, with record installations of about 15 GW in the first half of 2024, as developers rushed to complete previously delayed ...

## India's total solar power installed capacity

Notably, the total solar capacity added in 2024 is the highest recorded capacity in any previous year. With these additions, India's total installed renewable energy (RE) capacity reached 209.44 GW as of December 2024. ...

The total capacity addition during 2024 amounted to 28.64 GW, a year-on-year increase of 119.46% compared to the 13.05 GW added in 2023, as per the data available from the Ministry of New and Renewable Energy. In ...

As of the end of 2024, solar PV represented nearly half (47%) of all renewable energy installed in India. In total, India has installed 209.44GW of solar PV, wind and hydro capacity as of the end ...

India has reached a milestone by exceeding 100GW in national solar power capacity, strengthening its status in the global renewable energy sector. The achievement aligns with the nation's commitment to a sustainable ...

India's total installed solar capacity stood at 100.33 GW as of Jan. 31, 2025, with 84.10 GW under implementation and an additional 47.49 GW under tendering.

**Solar Sector Drives Renewable Surge** India's solar power sector led the renewable energy growth, with capacity additions soaring from 15 GW in FY24 to nearly 21 GW in FY25, ...

India's total renewable energy installed capacity surged by an impressive 24.2 GW (13.5%) in just one year, reaching 203.18 GW in October 2024, up from 178.98 GW in October 2023. Additionally, when including ...

**India Solar Power Capacity 2024:** India added 24.5 Gigawatt of new solar power capacity in 2024, the highest ever achieved in any year, and more than double the solar capacity added in the previous calendar year 2023. ...

The rooftop solar sector also experienced growth, with 4.59 GW of new capacity installed in 2024, marking a 53% increase compared to 2023. The PM Surya Ghar: Muft Bijli Yojana, launched in 2024, has been a key driver of ...

As of June 2024, India's cumulative installed solar capacity stood at 87.2 GW, with utility-scale projects making up nearly 87% and rooftop solar accounting for over 13%. Solar energy contributed 19.5% to India's installed ...

As on 20 th Jan 2025, India's total non-fossil fuel based energy capacity has reached 217.62 GW. The year 2024 saw a record-breaking 24.5 GW of solar capacity and 3.4 GW of wind capacity ...

## India's total solar power installed capacity

India's total GHG emission also includes CO<sub>2</sub> emissions from oil & gas sector and industrial processes and product use (IPPU) sector. The emissions based on India's first, ...

India's solar power sector has witnessed an extraordinary 3450 % increase in capacity over the past decade, rising from 2.82 GW in 2014 to 100 GW in 2025. ... India's total solar capacity ...

The Union Minister for New & Renewable Energy and Power has informed that as on 30.06.2023, a cumulative solar power capacity of 70,096 MW has been installed in the ...

The total solar power capacity installed in the country as on 30 June, 2023 is 70.10 GW. In addition, 55.90 GW is under installation. In addition, 55.90 GW is under installation. The Government is making all efforts through various ...

ALL INDIA STATUS Installed Capacity: Energy Generation: &#187; As on 31st March 2024, India's total installed power capacity reached 441.97 GW, an increase from 275.90 GW ...

Installation trends. As of March 31, 2024, about 68.2 GW of utility-scale solar capacity in India has been commissioned, while another 65.6 GW is under pipeline (where auctions are completed).; As of March 31, 2024, ...

As of December 2024, India's total renewable energy installed capacity has reached 209.44 GW, marking an impressive 15.84% increase compared to 180.80 GW in ...
