

What is the Inergy apex solar generator?

Inergy is a company that harnesses the power of solar and battery technology to create lightweight solar generators for several off-grid power needs. Their second solar generator release is called the Apex, which we'll be reviewing today. The Inergy Apex is an 1,100Wh portable power station weighing 25 lbs in total.

What is the apex solar generator?

Their second solar generator release is called the Apex, which we'll be reviewing today. The Inergy Apex is an 1,100Wh portable power station weighing 25 lbs in total. It features an MPPT charge controller, six AC outlets, and several 12V DC outlets. With 500W of maximum solar input, the Apex can recharge in about three hours.

How much does the Inergy apex weigh?

The Inergy Apex measures 14 x 9 x 8.9 inches and weighs about 25 pounds. While 25 pounds is a sizable weight in itself, in the solar generator world, with these dimensions, this is a very light system. A power station at this weight is relatively easy to move around and handle.

How long does it take to charge Inergy apex?

The fastest way to charge the Inergy Apex is through the use of solar panels. The power station allows for as much as 500W of solar input, which means that if you combine five 100W solar panels, you can fully charge the power station in as little as 2.2 hours.

Does the Inergy Apex come with solar panels?

The Inergy Apex is sold in kits that include solar panels. Inergy offers kits with either solid panels or flexible panels, and you can choose how many panels you want. The more panels, the faster the Apex will recharge.
