

Is it hard to find charging stations for electric cars

Are EV charging stations hard to find?

Electric vehicle charging stations are hard to find, but the frustration for EV drivers is compounded by the number of installations that are not functional.

Should you buy an EV charger if you have no offstreet parking?

If you own an EV and have no offstreet parking to charge at home, or if you are embarking on a long trip, it can be a significant challenge to find a working EV charging station. In fact, it's hard enough finding a charger in the first place, and the situation is often exacerbated by queues or the station being out of order.

Should you get a free EV charging station?

But if you suddenly find yourself with a rapidly depleting battery, and a car that needs 40-plus minutes of charging before you can get back on the road, it pays to be able to find an EV charging station as quickly as you can. Heck, you might even be able to find a free EV charger, saving some extra money in the process.

Should you use EV chargers on the road?

If you drive a gas-powered car, chances are you don't plan your trips around finding a gas station. It's not just that gas stations are everywhere. You also don't have to worry whether the pumps will work or how fast you'll be able to fill your car. Making efficient use of EV chargers on the road requires more thought.

Can electric cars be charged per minute?

An electric car owner prepares to charge his vehicle at a charging station in Corte Madera, California, on Sept. 23, 2020. Justin Sullivan/Getty Images Charging providers can offer EV drivers per-minute rates for the time they're parked charging up or per-mile rates that are often allotted in monthly subscriptions.
