

How much solar energy does Jackson EMC use?

For reference, the average Jackson EMC household uses 1,200 kilowatt-hours of electricity per month. Solar energy blocks are \$23 each per month. Residences served by Jackson EMC are eligible to sign up for Cooperative Solar. There is no long-term commitment, and you may discontinue your solar energy commitment at any time.

How does Jackson EMC generate electricity?

The electricity you receive is generated at off-site solar facilities. You can purchase solar energy blocks from Jackson EMC at a monthly rate. When you purchase a solar energy block, you receive the electricity produced by approximately three solar panels.

Does Jackson EMC have off-site solar?

Jackson EMC co-owns off-site solar facilities with 37 other Georgia EMCs through Green Power EMC. The off-site solar facilities generate clean, renewable energy and send it to the Jackson EMC power grid. Cooperative Solar subscribers will receive energy credits on their bill while getting the benefits of solar energy.

How do I contact Jackson EMC?

At Jackson EMC, we know solar and can help you evaluate your solar energy options. Call us at 1-800-462-3691. Where are the Cooperative Solar facilities?

Does Jackson EMC have a high energy rate?

Jackson EMC's residential electric rates are highest in September, with the highest average bill occurring in July.

How many solar panels are in a Georgia EMC?

Each solar energy block will receive the electricity produced by approximately three solar panels at one of the off-site solar facilities co-owned with 37 other Georgia EMCs through Green Power EMC (currently Hazelhurst, Snipesville and Terrell). What does it cost to enroll in the program?
