

What is the Tesla Supercharger in Kettleman City?

The Tesla Supercharger station in Kettleman City between Los Angeles and San Francisco is not Tesla's largest in the world, but it is the largest in the US, and it is the most representative of Tesla's vision for charging stations.

What is the Kettleman City Supercharger station?

The Kettleman City Supercharger station connects two of Tesla's largest metropolitan markets: Los Angeles and San Francisco. It's a 380-mile trip between the two cities, and most Tesla models and variants need to stop for a quick charge when making the trip:

Where is Tesla building a Supercharger station?

According to a development application filed in California, Tesla is gearing up to build a brand-new Supercharger station in dry Lost Hills, about 2.5 hours away from Los Angeles. The ambitious project is located in Kern County, California, at the intersection of the five freeway and the 46 highway.

Will Tesla Supercharger stalls be a good idea for cybertruck owners?

These stalls would be particularly relevant for owners of Tesla's upcoming Cybertruck. Tesla is using a microgrid comprising batteries and solar panels to make the Supercharger station more eco-friendly and reliable. They're using sunlight to generate power and storing extra energy in batteries.

Where are Tesla charging stalls located?

The ambitious project is located in Kern County, California, at the intersection of the five freeway and the 46 highway. As the premier charging network for Tesla owners, it will play a crucial role in alleviating anxiety over the range of the vehicle whilst facilitating long-distance travel with plans for 164 charging stalls.
