

What is a Lennox solar AC?

If you don't know where to start, you might want to check out the Lennox solar air conditioner. These units use the rays of the sun to charge the devices, cutting down on your energy bills, while still keeping your home as cool as you need it. A Lennox solar AC is an air conditioner that uses natural sunlight to harvest energy.

Does Lennox have a solar air conditioner calculator?

Lennox has its own solar calculator that you can use to see how much money you might save when you install air conditioner units of this type in your home. As the solar air conditioner uses less energy than other HVAC air conditioners, you'll see smaller cooling bills within the first month.

Are Lennox air conditioners solar ready?

Lennox has come up with the most precise and efficient air conditioning technology, its brilliant and innovative air conditioning systems saves a lot of your money. It offers an extraordinary shield from humidity. Lennox air conditioners are solar ready which can be easily installed with solar roof modules.

Are Dave Lennox heat pumps solar-ready?

All new heat pumps and air conditioners from the Dave Lennox Signature Collection are solar-ready, which means they can be easily integrated with solar modules in a complete SunSource Home Energy System.

What are the benefits of a Lennox solar air conditioner?

A Lennox solar air conditioner also comes with some incentives, including a tax credit that you can use to reduce your tax bill next year. Depending on where you live, your electric company might give you a reduced rate or a bonus for upgrading to one of these devices.

Who installs Lennox air conditioners?

Lennox air conditioners are installed by Lennox-authorized dealers. However, some affordable Lennox Elite and Merit Series central ACs can be installed by any licensed HVAC contractor.
