

Are solar panels worth it in Long Island?

Solar panels can lead to some cost savings over time. How long does it take to pay off solar panels? Seven to 10 years on Long Island, depending on any number of factors, including the extent of the installed system, the specific area on Long Island where you live and the overall energy consumption.

Why is Long Island a good place for home solar?

As such, the incentive varies, but the PSEG rewards program can be a great way to reduce the cost of a solar and battery system. The second reason why Long Island is a great place for home solar is because electricity prices are very high, which translates to more solar savings.

Can you go solar on Long Island?

The first incentive that would apply to going solar on Long Island is the NY-Sun Megawatt Block program. This program reduces the upfront cost of going solar based on the size and location of the system. There are three regions: Con Edison, Upstate, and Long Island.

Does Long Island still have solar incentives?

There are three regions: Con Edison, Upstate, and Long Island. Unfortunately, the Long Island region maxed out in 2016 and no longer has incentives. However, while the NY-Sun solar incentive has expired in Long Island, there are still funds remaining for battery storage, which we'll discuss later in this article.

Should you switch to solar energy in New York?

Between Long Island's relatively large number of sunny days and New York state's solar-friendly policies, shifting to solar energy is certainly worth considering. CNET named New York state one of the best U.S. states for solar incentives.

How much solar energy does New York use?
