

# Los angeles department of water and power solar incentive program

Does LADWP offer a solar metering program?

The Los Angeles Department of Water and Power (LADWP) offers a net metering program to customers who connect their solar system to the energy grid. This program has been in operation since 1999.

When did LADWP start its solar program?

The Los Angeles Department of Water and Power (LADWP) has operated a solar program since 1999. They offer a net metering program to customers who connect their solar system to the energy grid.

Does Los Angeles have a solar incentive program?

The Los Angeles Department of Water and Power (LADWP), the nation's largest municipal utility, tapped CSE to administer its Solar Incentive Program that offered rebates to homeowners and businesses for photovoltaic systems.

What solar programs does LADWP offer?

To make solar more widely available to residential customers, especially those in neighborhoods with less access to solar technology, LADWP offers three residential solar programs: Solar Rooftops, Shared Solar, and Virtual Net Metering (VNEM), along with Feed in Tariff (FIT), and other commercial customer programs.

Does LADWP offer direct solar incentives?

LADWP no longer offers direct solar incentives to its customers. In the past, direct incentives like rebates were used to support the development of a solar marketplace and lower prices for consumers. These incentives were effective, and prices for solar installations decreased significantly. As a result, LADWP phased out solar incentives.

Does LADWP currently offer a solar rebate?

LADWP is not currently offering any rebates or other incentives for new solar customers. They previously had a solar rebate offering, but the program ran out of funds in late 2018. In order to connect your system to the grid, you have to take a few steps to ensure you receive your two-way meter.
