

What is LS vision low power solar camera?

LS VISION low power solar camera uses advanced image processing technology and supports full-color night vision. It can present clear and realistic color pictures even in low-light environments, saying goodbye to the blur and monotony of traditional infrared night vision.

What are 4G low power solar cameras used for?

Our 4G low power solar cameras are widely used in construction sites, reservoir dams, fisheries and forests, wildlife protection, mine roads, forest fire prevention, highways, scenic area monitoring, and other scenarios.

What is a solar camera & how does it work?

It is designed for outdoor environments without electricity and network and inconvenient wiring. It uses high-efficiency monocrystalline silicon solar panels, which can provide a stable power supply even in low-light environments, ensuring that the camera can work continuously all year round.

How ls-4gs20l-20x 4G solar camera works?

Let's take LS-4GS20L-20X 4g solar camera as an example, 20X optical zoom can monitor 300-500 meters ultra-long distance, and color night vision can make the night picture as clear and colorful as the day. Support SD card and cloud storage, making the video safer without worrying about loss.
