

How can I use excess solar energy in Maui?

In Maui, you can export all excess solar energy back to the Utility grid and receive a 12.17 cent credit, per kWh, for use at night. Credits can only be used for the current billing cycle. Alternatively, you can keep all excess solar energy on site by storing it in your battery.

Why should you choose Sunrun for solar panels in Maui?

The costs of rooftop solar panels and back-up power are at an all-time low. Add to that Maui's average of 276 sunny days per year, and you can bet that choosing a company like Sunrun for solar will be incredibly cost-effective. This decision can boost your control over electricity bills and reduce your carbon footprint for decades.

Who is Maui Energy Advisors?

Built to represent you throughout the whole process, Maui Energy Advisors is dedicated to advancing renewable energy solutions across Maui, providing expert advice and installation services that cater to both residential and commercial needs. Our team is committed to sustainability, efficiency, and helping our clients achieve energy independence.

How long does a solar system last on Maui?

Solar installations on Maui typically offer significant savings on electricity bills, with a payback period that can range from 5 to 10 years, depending on the system size and usage. What are the environmental impacts of solar energy production on Maui?

How much do solar panels cost in Hawaii?

The average solar panel installation costs \$2.67 per watt in Hawaii. "Cost per watt" is similar to the price per square foot when you buy a house. It helps you compare the value of solar energy systems in different sizes. The federal solar investment tax credit is usually the most significant financial incentive when buying solar panels.

Does Maui have a battery storage system?

With Brightbox, Sunrun's battery storage service, your solar installation in Maui can help keep your devices and appliances running during cloudy days, rainy afternoons, or at night. With a Maui battery storage system like Brightbox, electricity is as local as you can get. Hawaii is the most fossil fuel dependent state in the nation. 11
