

Can solar panels be installed in Shanghai Metro?

“There is plenty of rooftop space to install solar panels in the rail transit system. The panels generate power while the metro system operates, so a high proportion of solar power generated can be used directly,” said Mu Zhenying, Chairwoman of the Shanghai Metro New Energy Co., Ltd. The project has brought significant environmental benefits.

What role does solar energy play for MetroCentre?

Solar energy is a significant part of MetroCentre's long-term strategy for sustainability and community involvement. This project, and others like it, contributes to reducing our carbon footprint and bringing renewable energy to the local community.

Will MetroCentre be able to generate power from solar photovoltaics?

MetroCentre is committing to the biggest solar photovoltaic project of its kind at a UK shopping centre to generate power. Cabinet Member for Environment and Transport, Councillor John McElroy, stated: 'It's great to see MetroCentre generating power from solar photovoltaics'. Customers with electric vehicles can also charge while they shop.
