

Who is an electric vehicle charging station installer?

An Electric Vehicle Charging Station Installer is a person or entity that installs, maintains, or repairs electric vehicle charging stations.

Where can a charging station be installed?

They can be installed both in the garage and in the driveway or outside parking lot. All of our pedestals can be easily fixed to the ground, which ensures a solid installation of the charging station. What's more, the ergonomic design of the pedestals makes it easier to organise the cables and wiring needed to charge the vehicle.

What is the charge up Michigan program?

The Charge Up Michigan Program is an EV Charger Placement project that aims to build the infrastructure for DC fast charging stations in the state of Michigan to ensure feasibility of all long distance trips for electric vehicle (EV) users, within the state, and also to neighboring states and Canada.

Who can apply for a public charging station grant?

Public or private organizations that can host publicly accessible charging stations, can fulfill program priorities, and are enrolled in a utility rebate program are eligible to apply for this grant.

How much is a EV charging grant?

The grant amount will be the lesser of 33.3% of the total cost or a direct match of the amount the electric utility is paying, up to \$70,000, and can only be used for eligible EV charging equipment. Grant awards will be distributed on a reimbursement basis only, meaning grantees must pay project costs in full prior to receiving funds from EGLE.
