

Does Michigan have enough solar power?

According to the Solar Energy Industries Association, Michigan had enough solar capacity to power 83,045 homes in the first quarter of 2021 -- out of 4.6 million homes in the state. That's just 1.8 percent of Michiganders' homes. Solar companies numbered 188 in Michigan, employing 3,379 people out of 231,000 jobs nationwide.

Are large scale solar projects coming to Michigan?

Large scale solar projects meant to power Michigan's homes and businesses are expanding, with potential developments popping up across the state.

What percentage of Michigan's energy consumption is solar?

In 2019, Michigan ranked 30th among states for its renewable energy consumption as a percentage of total energy consumption at 8.5% -- but solar accounted for just 0.37% of that. Renewable energy generation accounted for 11% of all generation, with wind making up three-fifths of the total amount.

Are wind and solar energy a good investment in Michigan?

Wind and solar energy are among the least expensive forms of electric generation in the country. Solar and wind resources are abundant throughout Michigan. Costs of both solar and wind energy systems are forecast to continue declining. Increased market activity in renewable energy development will therefore continue well into the future.

Will Michigan increase its solar energy production in the future?

The utility expects to vastly increase its solar energy production in the future. (Bridge photo by Dale Young) When what was then the tallest wind turbine in the U.S. was erected on the outskirts of Traverse City in 1996, it was hailed as a sign of Michigan's clean energy future.

How many solar companies are there in Michigan?

Solar companies numbered 188 in Michigan, employing 3,379 people out of 231,000 jobs nationwide. California employed more than 68,000, Florida more than 11,000, and Texas and New York more than 10,000 each. What incentives exist for Michiganders who want to install solar energy?
