

Why should you choose Midwest solar?

Rather than costly installation and bulky systems, solar power has become an affordable way to both lower energy costs and save the environment. Midwest Solar Inc. is the area's premier solar expert and Sioux Falls' only full-service solar provider. We offer a full menu of services to assist our customers from installation to monitoring and beyond.

What is the largest solar energy facility in the Midwest?

The North Star Solar Project is the largest solar energy facility in the Midwest, producing enough energy to power approximately 20,000 homes.

Who is Midwest solar power?

Midwest Solar Power LLC was founded in 2009 and brought together their backgrounds in construction, project management, and customer service to modernize the solar installation business. Here at Midwest Solar Power we strive to be the premier local solar installer in Madison by doing honest, high quality work at a fair price.

Does the Midwest have solar energy systems?

The Midwest has ample amounts of land to support solar energy systems. Although solar adoption remains uneven across the region, the companies providing quotes may differ from those described in independent reviews.

Where can I install solar panels in the Midwest?

Solar panels can be installed in Iowa, Illinois, and Wisconsin by Eagle Point Solar, which is the largest single installer in the Midwest with over 3,100 systems and 73 megawatts installed. Sun Solar serves Missouri and most of Illinois and Kansas and offers Tesla's solar tile system, roof and ground-mounted systems as well as custom solar carports.
