

Is solar energy a good option in Minnesota?

As consumers learn more about solar potential in Minnesota, demand will continue to rise. Advances in technology, declining equipment costs, and financial assistance in the form of tax credits and incentives make solar an attractive clean energy option. If you are interested in powering your home with solar energy, Commerce is here to help.

What are the best solar panel incentives in Minnesota?

One of the best solar panel incentives in Minnesota is net metering. If you connect your solar panel system to the grid, you earn credits when you send excess electricity from your solar panels to the grid.

Does Minnesota offer a solar rebate?

Minnesota Power offers a solar rebate program based on your first-year estimated production. Because Minnesota has a strong Renewable Portfolio Standard (RPS), there are a number of utility rebates available for solar in Minnesota. Most of these rebates are calculated as dollars-per-kilowatt of generating capacity.

How do I get solar credits in Minnesota?

Minnesota residents can earn credits through net metering, which offsets future utility bills. Depending on where you live, you might be able to take advantage of solar rebates and other programs: Solar rebates: Minnesota Power's SolarSense rebate program is good for up to \$5,000 (or 60% of installed costs, whichever is less).

How do solar energy incentives work?

Solar energy incentives come in the form of Renewable Energy Credits (RECs). Home solar systems receive \$0.04 per kWh, and commercial solar systems receive \$0.03 per kWh. You will receive an annual payout for your solar power generation for 10 years, which averages to \$500 a year or \$5,000 over the program's duration.

What is the federal income tax credit for solar panels in Minnesota?

When you file your federal income taxes, you can claim a 30% credit towards your federal tax bill for installing a solar panel system. The average cost for a 5 kW solar panel system is around \$15,535 in Minnesota, which comes down to \$10,875 after the credit.
