

Can I purchase a solar system in Missouri?

Missouri residents can purchase a solar system with a capacity less than 25 kW using the Property Assessed Clean Energy (PACE) program. These loans have low interest rates and are paid back through a fee added to your property taxes. You can buy a solar system in Missouri if you live in Columbia, as there is an extra financing option available.

Are solar panels a good investment in Missouri?

Solar panel systems in Missouri are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and other state-specific incentives, you can save thousands on solar panels, making them well worth the investment.

How much do solar panels cost in Missouri?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Missouri homeowner needs a 12.21 kW solar panel system to cover their electricity needs, which comes out to \$35,321 before incentives. Prices range from \$30,023 to \$40,619, but after the federal tax credit, that drops by 30%.

How much does a 5 kW solar system cost in Missouri?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$14,461 in Missouri.

Does Missouri offer a solar rebate or tax credit?

While Missouri does not offer any tax breaks, it does have several solar rebate incentives. You can also apply for a low-interest solar loan if you cannot pay for your system out-of-pocket. Several local power companies in Missouri offer solar rebate programs for their customers.

What are the best solar panel incentives in Missouri?

If you connect your solar panel system to the grid, you can benefit from net metering, one of the best solar panel incentives available in Missouri. With net metering, you earn credits when you send excess electricity from your solar panels to the grid.
