

How to monitor a Growatt inverter and datalogger?

To monitor your Growatt inverter and datalogger, you need a monitoring device that connects them to the internet. This can be a Growatt Wi-Fi dongle, a Growatt Shine LAN-X dongle, or a Growatt Shine Link-X box. Additionally, you need a smartphone running on iOS or Android to use the ShinePhone app, which is available for free on the App Store or Google Play Store.

What types of inverters does the Growatt app support?

The ShinePhone app supports all Growatt inverters, including grid-tie, off-grid, hybrid, and storage inverters. To use the app, you'll need a monitoring device that connects your inverter or datalogger to the internet, such as a Growatt Wi-Fi dongle, a Growatt Shine LAN-X dongle, or a Growatt Shine Link-X box.

How do I access the Growatt monitoring system?

To access the Growatt monitoring system, users need to follow a straightforward login process. Here's a step-by-step guide: Create an Account: Users must first create an account on the Growatt monitoring platform. This can be done through the Growatt website or the ShinePhone mobile app.

What devices does the Growatt monitoring platform collect data from?

The Growatt monitoring platform collects and displays the data from Growatt inverters and monitoring devices. It is designed for Growatt customers who want to monitor their inverters on their smartphones.

What can I manage on my Growatt inverter account?

On your Growatt inverter account, you can manage multiple devices such as inverters, batteries, dataloggers, etc. You can also share your devices with other users or transfer them to other accounts.

Where can I Find my Growatt inverter serial number?

To use the ShinePhone app to monitor your Growatt inverter, you'll first need to find your inverter's serial number or QR code. You can find this on the label of your device or on the web interface.
