

Moving solid stick deodorant to smaller container

Can you bring a Stick deodorant?

You can bring stick deodorant in any size. However, spray, gel, cream, paste, and roll-on deodorants must be in containers of 3.4 ounces or less and placed in a clear quart-sized bag. Powder and crystal deodorants are also allowed. The TSA defines liquids as substances in containers larger than 3.4 ounces that can pour or spill.

What is a solid Stick deodorant?

A solid stick deodorant is not a liquid, nor is it a gel/paste, nor is it an aerosol. The deodorant I use is called a "soft solid", and comes in the same type of container as a solid stick, but it is a cream consistency - it goes in the bag. You can always put questionable items in the baggie anyway, so if it doubt, put it in.

What is the size limit for stick deodorants?

Size Limit: The TSA specifies that for carry-on luggage, stick deodorants must adhere to the 3.4-ounce size limit. This rule applies to all liquids, gels, and aerosols under the same category. Stick deodorants that exceed this limit must be placed in checked baggage.

Are stick deodorants liquid?

Stick deodorants, being solid forms of personal care products, do not fall under the liquid category. This classification means travelers can bring them without measuring volume limitations, which applies to liquids over 3.4 ounces (100 milliliters).

Can you take solid Stick deodorant on a plane?

In summary, you can take solid stick deodorant on a plane in your carry-on, as long as it is within the TSA's size limitation of 3.4 ounces for liquid products. Understanding these regulations and being aware of your specific airline's policies can enhance your travel experience.
