

Can Native American tribes go solar?

The Department of Energy and Mineral Development has a grant program for tribes to access government funds for solar development, and its staff can help tribes through the process of going solar. GRID Alternatives also help identify funding sources for Native American solar.

What is NATiVE Solar?

NATiVE Solar is a company responsible for hundreds of home solar panel installations in Texas, proudly serving the state for over a decade.

Does Navajo tribe have a solar farm?

The Navajo Tribal Utility Authority now has a 27.5-MW solar farm on 300 acres in a Navajo community south of Monument Valley, Arizona, according to the Associated Press. AP reports the solar farm "delivers energy across the reservation and into Arizona, California, New Mexico and Utah."

Which tribes have added solar to their portfolios?

Here are eight tribes that have added solar to their portfolios. The Navajo Tribe has operated the coal-fired Navajo Generating Station since the 1970s, but the plant will soon close in 2019 due to competition from falling natural gas costs.

How did Black Rock Solar help the Washoe Tribe?

The Washoe Tribe contracted nonprofit Black Rock Solar to build seven ground-mount solar arrays at community centers on the tribe's land. The tribe financed the project that will offset energy costs for about 50 homes with help from a \$470,000 grant from the Department of Energy and NV Energy rebates.

What is native renewables' Hozho Homes program?

Using off-grid solar photovoltaic systems, Native Renewables provides power to homes on the Navajo reservation and Hopi reservation through our Hozho Homes Program. Need Power? Native Renewables designed the Hozho Homes Program to provide Navajo and Hopi families access to off-grid solar photovoltaic systems through a low-interest lease.
